

GLOBAL VARIABLES WORKSHEET

Fill this out once, before you start building (Part VI). Every value below gets substituted in dozens of places throughout your own copy of this manual and its code — filling it out first means you're copying from one page instead of hunting through six different sections mid-build.

I. Identity

<u>Variable</u>	<u>Your value</u>	<u>Where it's used</u>
Group / project name		Throughout
Prefix (3+ letters, see Part VI, 6.1 & 6.4)		Every category code, tactical address, file/repo naming
Coverage area (county, region, or state)		Map default view, public-facing text

II.. Accounts (Part VI, 6.2–6.8)

<u>Service</u>	<u>Shared Email</u>	<u>Account Created?</u>
GitHub		☐
Grist		☐
uMap (OpenStreetMap login)		☐
TailScale		☐
Gmail (for Winlink polling)		☐

****Never use a personal email for any of the above**** — see Part I, note 7.

III.. Repository & Hardware

<u>Item</u>	<u>Your value</u>
Your forked repo name (Part VI, 6.3, step 5)	
Your forked repo URL	
Hardware choice (Part II, 2.1)	☐ Small always-on computer (Pi) ☐ Older Linux computer
Admin app password (`___ADMIN_PASSWORD`)	(store in credentials file only — never in this saved file/worksheet once filled in)

IV. Category, Status & Specifier Lists (Part III, 3.1)

Your own three lists, re-derived for your own area — don't copy KCGR's list wholesale; Part III's method assumes local judgment, not reuse. Not a fill-in-these-blanks exercise.

<u>List</u>	<u>Where it's documented once decided</u>
Categories Your Part III Equivalent	"What general things get reported in your area? (3–8 is a reasonable range) <i>This discussion is documented at:</i>
Status Codes	"How many severity/urgency levels does your group actually need?" <i>This discussion is documented at:</i>
Specifier Codes	"What optional details modify a category without needing a whole new one?" <i>This discussion is documented at:</i>

V. Winlink Tactical Address (Appendix C)

<u>Field</u>	<u>Your Value</u>
Tactical Address	_____ -OPS@winlink.org` (or your own suffix)
Character count check	_____ / 24 max, _____ letters before hyphen (need 3+)
Password set?	☐ Yes ☐ No — see Appendix C, "worth setting" note

VI. Character Budget (Part VI, 6.4)

Only relevant if your prefix differs in length from `KCGR-` (5 chars):

Your Prefix Length	_____ characters
Compared to `KCGR-` (5 chars)	☐ Shorter (gains room) ☐ Same ☐ Longer (costs room elsewhere)

VII. Assigned Operators

<u>Role</u>	<u>Name/Contact</u>
Hub Operator	
Stand-In Operators (Part V, 5.2)	
Local EM Office Contact (Part IV, 4.2)	

**** Once filled out, this page becomes the answer key for every  marker in parts II through VI, if coordinating (Part IV, 4.2)**
